Bespoke service: cuts & shapes

All Doccia shower trays may as well be cut to fit the customer's requirements. The cuts are performed with a diamond blade.

Significant cuts may affect to the inclination of the shower tray, causing an irregular thickness.

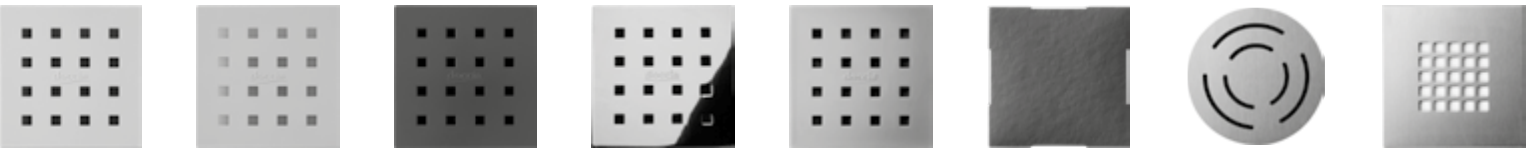

First cut is free of charge, following ones such as shapes and pillars are optional.

Cuts under 4 cm are made always on the same side of the tray. Wider cuts may be distributed in order to keep the position of the valve.

Cut edges may be painted so as to preserve a smooth finish in visible parts.

RAL colour chart

All the products can be manufactured in a wide range of colours. Gel-Coat is available in many colours of the RAL colour chart. Our product is a full bodied product, therefore the colour of the interior is the same as the one of the surface.

Gel coat

DIAMOND-HARDNESS
GEL-COAT ISO NPG
SOLID AND DURABLE

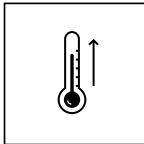

Coating is an essential element in the product because it is the best protection against external conditions such as aging, water, temperature, light, chemicals, etc. Its 600 microns thickness, our gel coat technology is perfectly fused with the resin mixture making each of our shower trays a unique product, giving it a strong resistance.

The Gel-Coat also gives the shower tray its structured look and its beautiful design.

In addition, the Gel-Coat has strong anti-slip properties, something really important in this type of product.

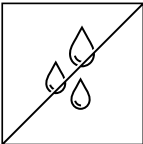

Made to last
Shower trays properties

Resistance against high temperature

Stability and rigidity

Water-repellent (absorption <0, 01%)

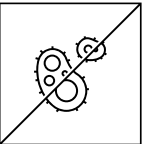

Non-porous

Resistance against hydrolysis

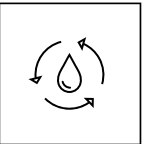

Anti-slip level three (UNE ENV 12633)

C4 DIN 51907 PN24 (XPP05-010)

Antibacterial
Rot proof

Low water consumption

80% made out of natural elements

Resistance against scratches

Resistance against impacts

Resistance against abrasion

Easy to assemble

Easy to repair

Easy to cut

Easy to clean (EN 14527)

Resistant to stain (EN 14527)

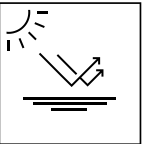

High resistance against chemical

Pleasant touch

The surface preserves heat

Sound proof material

Compact and homogeneous

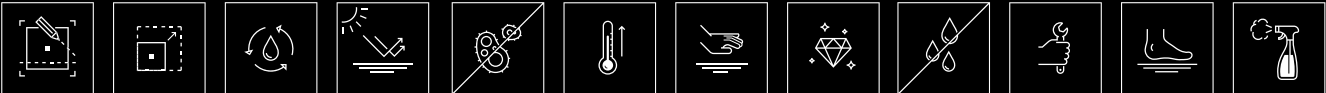

Resistance against UVA rays

WALL PANELS

Our decorative wall panels are available in a wide range of sizes and six colours: white, pergamo, grafite, grey, musgo and arena. Each colour and size may be combined according to the customer’s needs. Thanks to the wall panels, bathrooms are transformed into a pleasant space in a more than simple way.

XXL Phenolic Wall Panels
Doccia nano-coating®.

Endless possibilities

Doccia® Nano-particles is the result of years of investigation and innovation.

Thanks to this technology we are now able to produce wall panels with sizes up to 2000x3600 mm. and with a thinner thickness of up to 3,5 mm. keeping the mechanical and aesthetic properties of phenolic materials.

Our phenolic wall panels are coated graphene by implementing the patented Doccia® Nano-particles technology.

- High resistance to humidity, water and water vapor.
- Highly resistant to a high number of chemicals.
- Resistant to impacts and scratches.
- Easy installation and assembly.
- Beautiful design available in all colours from the RAL colour chart.

Packaging

Our shower trays are delivered in a palletized wooden box.

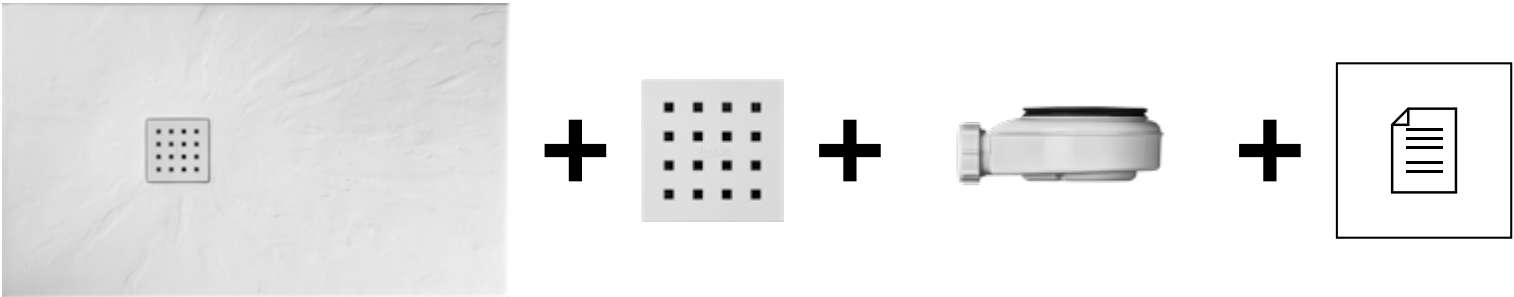

This box is custom-made and is perfectly adapted to the shower tray’s dimensions for a better protection when transporting.

The shower tray is also protected with polystyrene in all its faces.

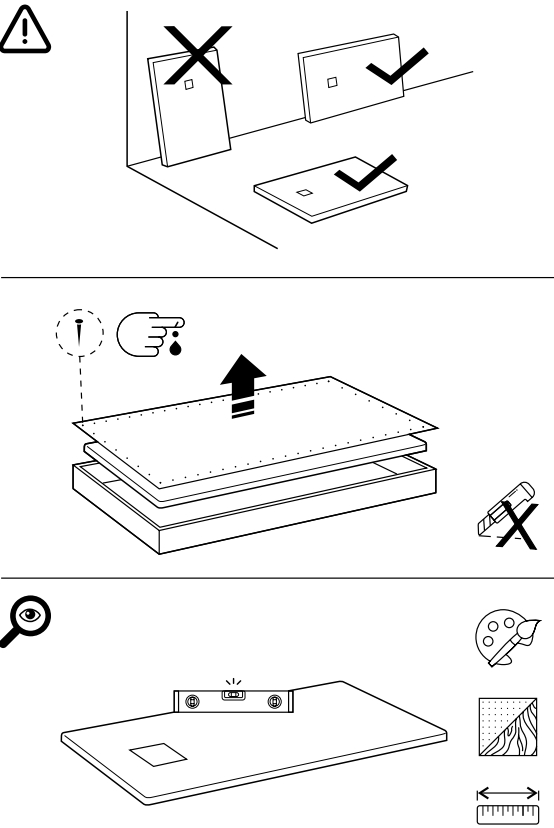

Each unit comes with a drain valve, a grill and the assembly instructions.

Contiene

Stock and Check

Stock the tray in an appropriate manner.

When opening the package, be careful not to scratch or damage the shower tray.

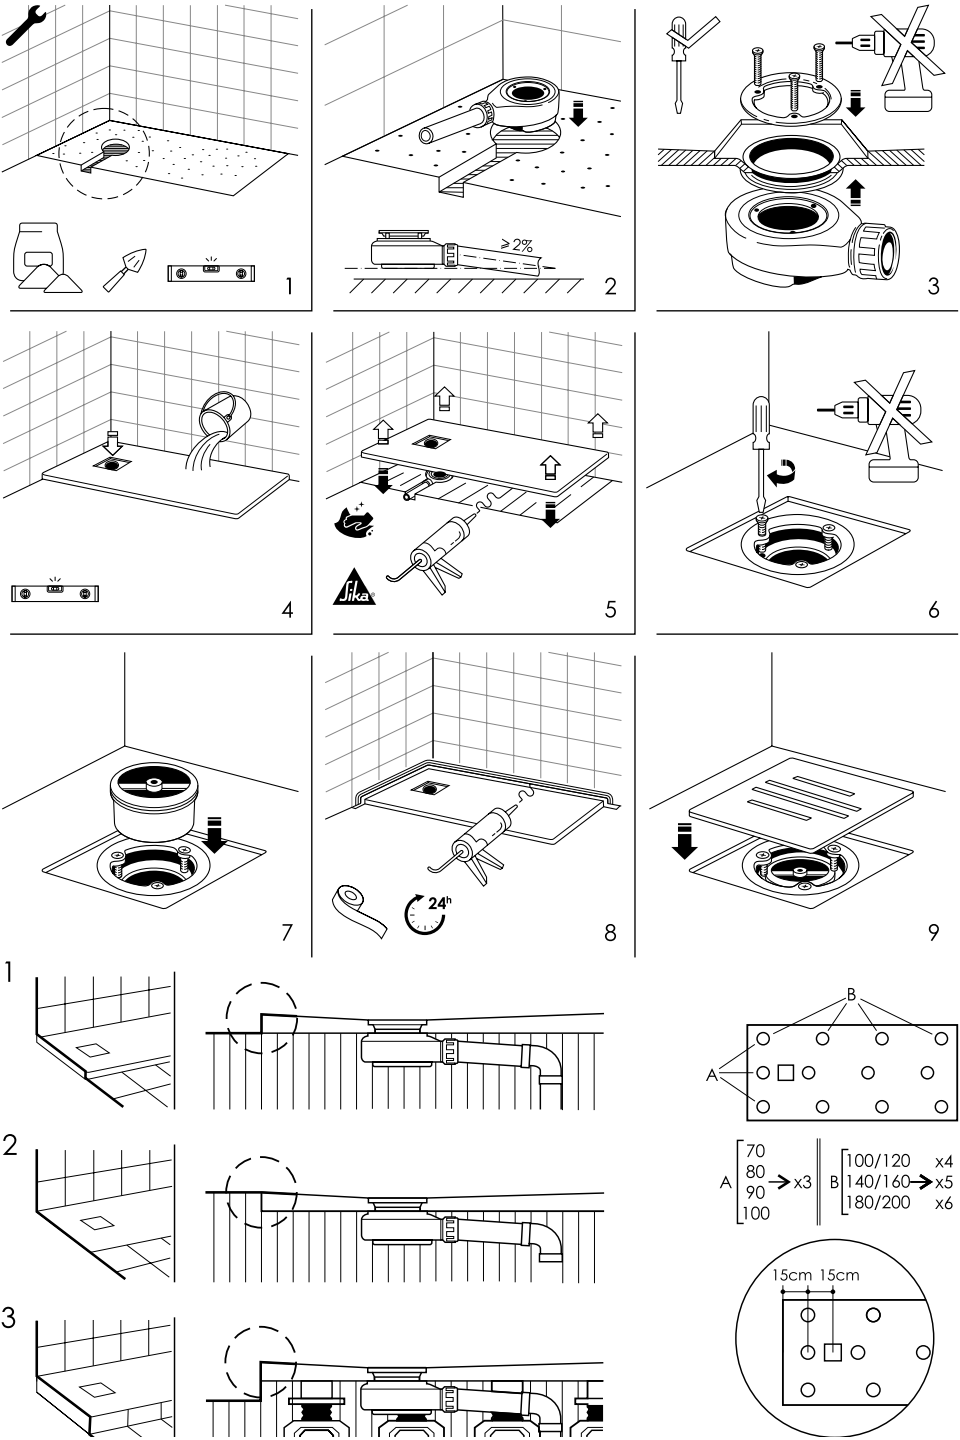

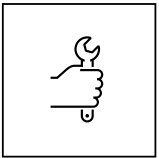

Before fitting the tray, please verify the following:

- That it drains correctly.
- That there are no visible damages on the surface.
- That the model, color and finish of the tray are correct.

No claims are accepted after the product has been installed.

Assembly instructions

INSTALLATION OPTIONS

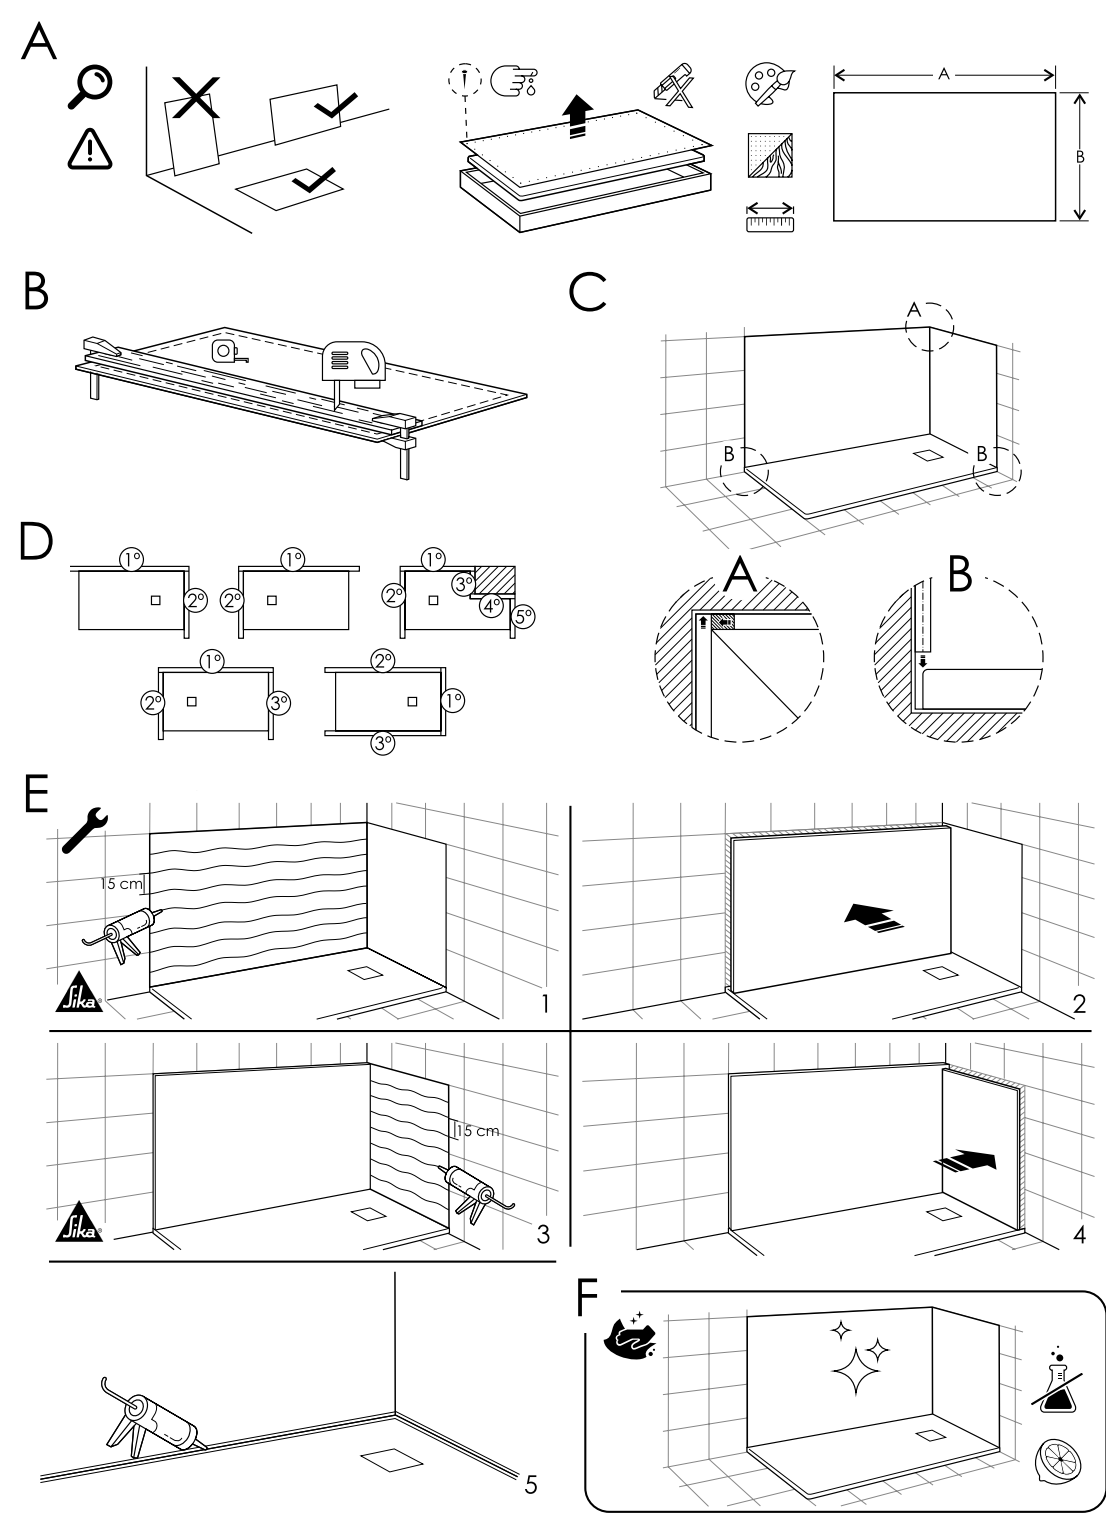

1. Standard / 2. Wetroom – like / 3. Raised.
Adjustable lifting brackets placement scheme.

SHOWER TRAY INSTALLATION:

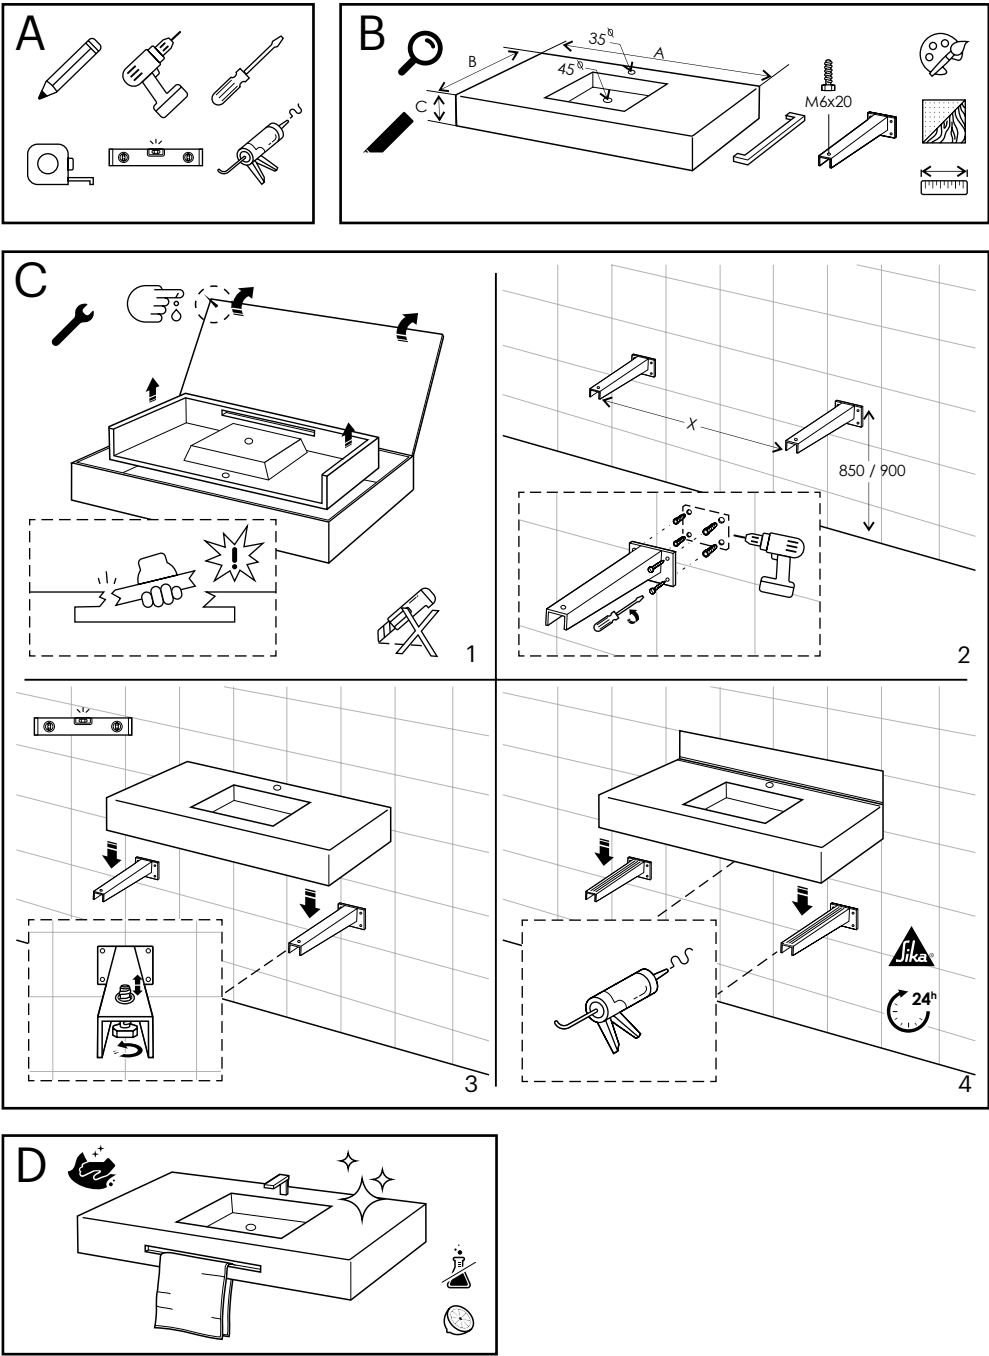

Initial suggestion: for trays larger than 1600 it is suggested to raise a few mm. the side opposite to the location of the waste to give the tray a better slope.

1. Set the position of the valve and prepare a flat base. Smooth and level.
2. Install the valve and make sure it is leveled with the base. Connect it to the waste pipe. Then make sure the slope of this drainage system is at least 2%.
3. Place the circular rubber joint in the waste location of the tray. Once you have made sure that the waste location of the tray and the valve are correct you can clean and prepare the base where the tray will sit. Fit the metal adjustment ring and screw it to the valve. Try not to use power drill.
4. Check that the tray drains properly and it is leveled correctly.
5. Now you can uninstall the tray and clean the flat base. Apply the proper adhesive product on that flat base (Sikaflex or similar) and now you can place the tray again on the base and make sure it is leveled.
6. Install the drain valve again. Try not to use a power drill.
7. Connect trap and waste pipe.
8. Proceed to sealing. Cover and protect the surface of the tray while sealing. Wait a minimum of 24 hours to make sure it dries correctly.
9. Place the grate in its location. The shower tray is now ready to use!!

Wall panels installation guide

Worktops Assembly instructions

WORKTOP INSTALLATION:

A. **TOOLS NEEDED.**

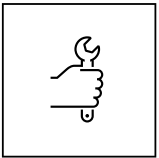

B. IMPORTANT:
Before the product gets installed, please the following needs checking: Model, size, colour and finish, to make sure they are correct / The surface is not damaged. Claims are not accepted after the product has been installed.

C. **FITTING THE PRODUCT.**

D. CLEANING AND MAINTENANCE:
The cleaning of the product needs to be done carefully so the surface doesn't get damaged. Use a soft cloth or a wet sponge.

For the worktops and basins in matt white, and just in case a deeper cleaning is needed. It is possible to use very thin sandpaper on the stain.

Don't use abrasive or very aggressive products on the surface.

Cleaning and maintenance

DAILY MAINTENANCE

We suggest using a nonabrasive sponge with hot water and soap. It is also recommended using neutral detergent instead of aggressive or corrosive ones. Right after that, wash all the waste with water and dry it with a normal cloth to avoid lime stains.

CLEANING AND MAINTENANCE (IN NORMAL CONDITIONS)

To get rid of the most common stains, the use of multipurpose detergent is recommended, as well as a non-abrasive sponge or a brush. Scrub the surface making circular movements, then wash it with water and dry it with a cloth to avoid lime stains.

PERSISTENT STAINS
CLEANING AND MAINTENANCE

For a thorough cleaning and in order to get rid of more persistent stains, the use of a more abrasive detergent is highly recommended, also scrubbing it with a slightly more abrasive sponge. Wash with water before drying.

If stains are very persistent, we suggest using a universal solvent for those shower trays with lighter color. For those with darker colors a cloth with white vinegar should be enough.

Wait for a couple of hours and wash with water.

PREVENTIVE MEASURES IN THE USE OF CLEANING PRODUCTS

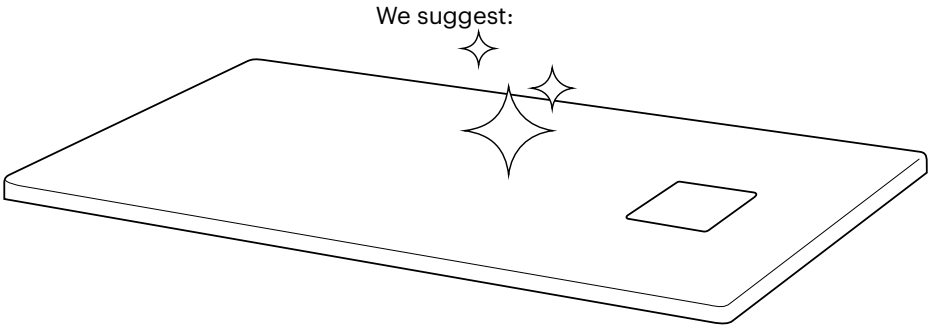

The life time of the product depends on the maintenance conditions. Any surface can be damaged by chemicals and strong solvents. Some products even attack the chemical composition of the product.

DOCCIA shower trays are very resistant to abrasion; however we do not suggest the use of cutting and sharp products.

DOCCIA shower trays are very resistant to chemicals, however, the use of this kind of products is not necessary in a daily basis.

- Avoid the use of high PH products, corrosive products, detergents or dye.
- We suggest not using products containing dichloromethane, such as paint stripper, or products containing hydrochloric acid or hydrogen chloride, contained in some steel cleaning products.
- Avoid the use of abrasive or steel scourers, and also products containing alcohol or turpentine.
- The resistance against chemicals and cleaning products is certified by the regulation: UNE-EN 14527:2006 Apdo. 5.2.1 and 2.

The tests carried out by an independent laboratory have given us great results, with no alteration in texture, shine or colour. The following products have been used for these tests: Acetic acid 10% v/v Sodium hydroxide 5% m/m Ethanol 70% v/v Sodium hypochloride Methylene blue 1% m/m.

Repair recommendations

In some cases there is the possibility of recovering the original appearance of the shower tray when it has suffered reversible damage, such as deep or shallow scratches or small flakes detached as a result of a crash on the Gel Coat surface.

SUPERFICIAL REPAIR

Any scratch or similar can be repaired following the instructions below:

- Sand down the damaged part and around it with a 100 grit sandpaper.
- After that, do the same with a 200 grit and a 400 grit sandpaper.
- To finish, moisten the surface using a 600 grit sandpaper.

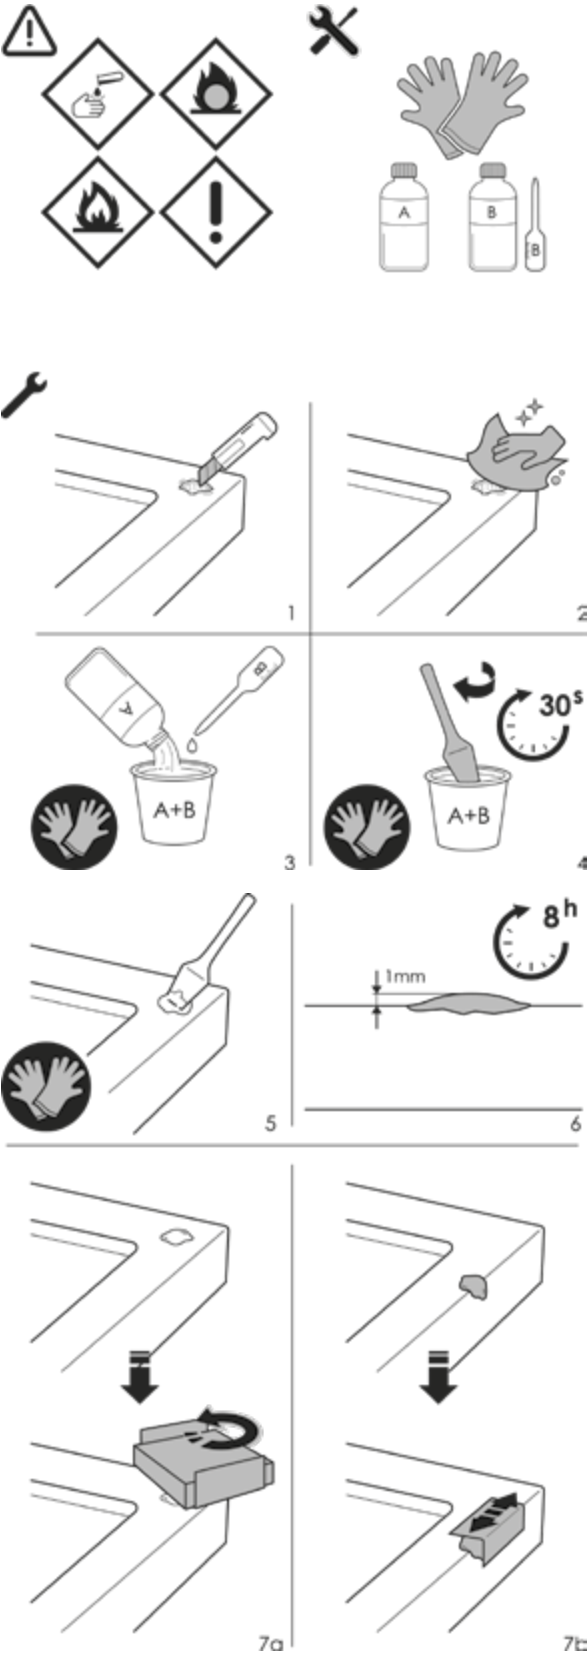

Depending on the texture and also on the size of the scratch, this repair can leave a difference in shine, touch and color.

REPLACING THE GEL-COAT

For those cases in which the gel-coat is seriously damaged, it is possible to replace the whole surface of the shower tray using a repairing kit.

That kit includes the gel-coat in the color that the customer requests and a catalyst that will allow you to, once the mix is made, create a whole new surface for the product.

Once the surface is dry, it should be finished following the instructions in “Superficial repair”.

Shower tray’s reaction to cleaning products, stains and chemicals
(Regulation EN 14527 2006 5.2)

PRODUCTS USED FOR THE TEST		LENGTH	RESULT	
			AFTER WASHING WITH WATER	AFTER WASHING WITH WATER AND ABRASIVE PRODUCTS
Acetic acid 10% v/v:	Vinegar, solvent	48h	No surface deterioration	-
Sodium hydroxide 5% m/m:	Caustic soda, plunger, cosmetic	24h	Slight change in shine	Alteration removed
Ethanol 70% v/v:	Solvents, fuel, alcohol	48h	Slight change in shine	Alteration removed
Sodium hypochlorite:	Bleach, disinfectant	48h	No surface deterioration	-
Hydrochloric acid:	Anti-lime cleaner	48h	Changes in shine	Alteration removed
Liquid nitrogen:	Insecticides	48h	No surface deterioration	-
Ammonia:	Hair dye, defatting..	48h	Slight change in shine	Alteration removed
Nitric acid:	Industrial paint-stripper	48h	Slight change in shine	Alteration removed
Methylene Blue 1% m/m:	Extreme colouring	24h	Stained surface	Stain removed
Sulfuric acid 70% v/v:	Colouring, detergents	48h	Slight change in shine	Alteration removed
Acetone:	Nail polish, solvents	48h	Slight change in shine	Alteration removed
Turpentine:	Stain remover, polish, varnish	48h	No surface deterioration	-
Coffee	-	48h	No surface deterioration	-
Povidone-iodine:	Betadine®	48h	Stained surface	Stain removed

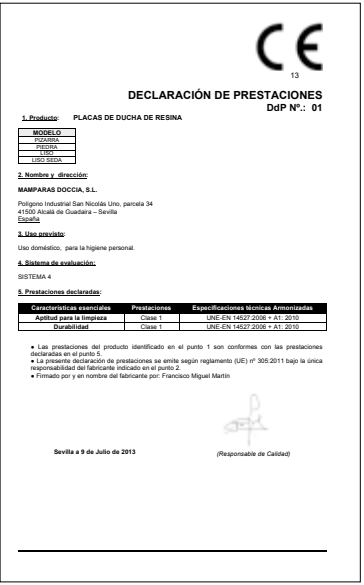

Product properties

Class 3 slip rating	Norma UNE ENV 12633: 2003 Anexo A (pendulum method, resistance >45)
Antibacterial	Without proliferation
Scratch resistant	High
Impact resistant	High
Resistant to temperature change	High
Colour stability	High EN 14527: 2006+A1: 2010 Anexo 5.3.2
Product and gel-coat exact same color	In all textures and also the RAL colours
Water repellent	Moisture absorption < 0,01%
Assembly instructions	Available
CE	Certificate DdP N°: 01. Clase 1. 9/7/2013
ISO 9001: 2008	Certificate nº 048771-1 Exp: 28/08/2016
Packaging	Palletized wooden box
Weight (without packaging)	Approx. 50kg/m2
Density	Approx. 1940kg/m3
Weight with packaging	Approx. 60kg/ m2
Compatible with shower screens and enclosures	All models
Drainage diameter (EN251)	90 mm

Our commitment to safety and quality

All our products have been manufactured to the highest European safety and quality standards.

This is only achieved by paying full attention to detail in every step of the manufacturing process.

DOCCIA GROUP Terms and conditions

Unless there is a previous written agreement, all sales are subject to this general sales conditions. The buyer’s general buying conditions are not recognized by Mamparas Doccia SL. All statements made by our representatives are not recognized by the company unless the company confirms it. All descriptions and pictures in this catalogue

must only be considered as informative. The company keeps the right to fully or partially modify the products, whenever the company wants and with no need to inform.

ORDERS:

Orders must always be made by email (orders@mamparasdoccia.com), or fax (+34 902 197 196) in order to avoid all possible mistakes and misunderstandings. Receiving or sending any goods means having accepted the general sales conditions, which become contractual after a confirmation is sent by Doccia SL.

DELIVERY TIME:

Mamparas Doccia SL will deliver the products to the address given at the moment when the ordered is placed. Delivery times are merely informative, and they will never be a reason to cancel or modify the order. Delivery times are not a reason to make any claim either. If any condition is not fulfilled due to external factors, Mamparas Doccia keeps the right to modify these conditions, notifying the customer as soon as possible.

CANCELLING STANDARD PRODUCTS ORDERS:

The company will charge 100% of the value of the goods ordered.

ITEM DAMAGED DURING SHIPPING:

If the goods are damaged during transportation, the customer must send a documented report in the next 48 hours from the moment the products are received.

CANCELLING BESPOKE PRODUCTS ORDERS:

The company will charge 100% of the value of the goods ordered.

In the case of a justified claim made in the stipulated period, Mamparas Doccia SL will send a replacement. If the customer does not notify Mamparas Doccia SL in the time period of 48 hours, the company keeps the right not to answer the claim and the customer will lose the rights previously mentioned.

PRICE:

The prices will be those in the price table at that moment. The company keeps the rights to modify the price without notifying it previously. The prices in the catalogue are SRP (Suggested Retail Price) without VAT.

RETURN ITEMS YOU ORDERED:

The company does not accept any return without having accepted it previously. The customer service department will be the only one allowed to accept a return and give the order to pick up the product. In the case of a non-authorized return, the company keeps the right to charge the customer for the costs of the return process.

TAXES:

Taxes of any kind are not included in these prices; they will be included in the invoice according to the law of that specific country.

GUARANTEE:

Guarantee is applied according to the current European legislation.

This guarantee does not cover the damages which are not imputable to the product itself or those caused by a careless use.

Excluded from the guarantee:

The damages and deterioration caused by the natural wearing away of the pieces, meteorological phenomena or an incorrect maintenance.

The damages on the surface of the product made by all kind of impacts will not be covered by the guarantee.

Our guarantee does not cover those products that have been installed without following our installation guide. In that case in which the company confirms the imperfection of the product, the guarantee covers the replacement of that product for an exact same one as long as it is possible with regard to our stock and manufacturing possibilities. If not, it will be replaced for a very similar one.

We will never be responsible for a damaged item if the item has been in contact with one of the products mentioned in the section called “Cleaning and maintenance recommendations”.

JURISDICTION:

For all the issues regarding the commercial and legal relations, the jurisdiction applied will be the one established in Seville (Spain) where Mamparas Doccia SL is registered.

COPYRIGHT:

All the pictures and illustrations are considered intellectual property and they are protected by the copyright. Its use without the consent of the company is completely forbidden.

COLOURS:

The products delivered do not have to be exact to the ones in the pictures and illustrations. There might be some differences between the real product and the pictures in the catalogue. This difference cannot be a reason to claim.

CUTS:

The cuts of the products will be made taking a plan or a drawing as a reference. They will be made centimeter by centimeter and with a 10% variation tolerance. Doccia will polish the edges if necessary.

DRAIN VALVE LOCATION:

The drain valve location varies depending on the size of the shower tray. The approximate location can be found in the technical specifications; however, it can vary between 1 and 3 centimeters due to the human intervention of the process.

DIMENSION OF THE PRODUCT:

The resin mixture is poured into a rigid mold, that gives the product a uniform shape, however, the material contracts a little bit during the drying process, that is why it can have a variation of a couple of millimeters.
